ADDENDUM NO. 1 (1 Page)

Reference: Bid Proposal # 431-2003-PA13-001
Caddo Pine Island and Wildcat Fields, Caddo and Bossier Parishes
Scheduled Bid Opening: 11 AM October 16, 2012

The following are the responses to the questions received prior to the deadline of 4:30 PM on Sunday, October 7, 2012 (5 consecutive days following the site visit). As stated in the bid proposal, no questions received after the deadline will be considered.

Question: *Will any remediation be required at well site SN 000521 procedure step #13?*

Answer: Lump sum bid should include only what is stated in procedure step 13 which does **NOT** include remediation or soil removal at this time. Once sampling results are provided which is required as part of step #13, a change order may be discussed regarding soil remediation.

Question: *Clarify staging 100' cement plugs in well P&A procedure for SN 000521.*

Answer: The assumption is that the 6" casing has been cut and pulled at an unknown depth. The goal of the provided procedures is to re-enter the 6" casing at the cut depth and put a cement plug at TD (on bottom) (step #5). Then set a 100' cement plug at the found 6" cut depth (step #7). After performing step #8, the well should be filled to surface in 100 sack increments waiting 4 hours and tagging and testing each stage, resulting in a full wellbore of cement from the 6" cut depth to the surface.

Signed addendum must be returned with bid documents as noted in General Conditions, Instructions, Policies And Procedures and Section 5 #2 Information Bidders Are Required To Submit With Bid Proposal.
